

## Why HAYES?

**H**ayes Heat Treating brazing services include Vacuum Brazing, Braze and Harden and Atmosphere Brazing in batch or continuous furnaces.

Hayes utilizes high purity controlled dew point atmospheres such as nitrogen, hydrogen and argon.

Hayes Heat Treating has a dedicated assembly area and can help your production scheduling, utilizing KanBan and inventory control methods.

Hayes Heat Treating is Nadcap approved and will provide you with consistent assembly, fixturing and brazing of your parts.

- Specialty Atmosphere and Vacuum Brazing
- High Purity, Controlled Dew Points
- Glass to Metal Sealing
- Aerospace Components · Medical Devices
- Assembly · Fixturing · Inventory Storage
